SUMMARY

Four-year Informatics student at with a passion for Web and Mobile Development, specializing in Frontend and Backend. Proficient in HTML, CSS, JavaScript, PHP, and API integration, with hands-on experience in designing and maintaining dynamic web applications. Skilled in MySQL for efficient data management. Adaptable, eager to learn, and capable of working independently or in a team.

EDUCATION

Institut Teknologi Del | Laguboti, Indonesia

August 2022 - August 2026 (Expected)

- Undergraduate in Informatics Engineering (3.64/4.00)

EXPERIENCE

Teaching Assistant For Basic Physics I and II Course, and Probability, Statistic Course | Institut Teknologi Del

July 2023 – December 2024

- Assisted in teaching and learning activities by preparing lecture materials, supervising practicums, arranging licenses, and evaluating student progress.
- Facilitated class discussions, provided guidance on physics concepts, probability and statistic concept, and strengthened communication, time management, and collaboration skills.

Programming | IGDX Bootcamp

May 2024 – September 2025

- Gained expertise in game development, including storytelling, programming, and user interaction design.
- Statistical methods and problem-solving while building interactive games using various programming languages and engines.

Teaching Assistant For Operating System Course and Algorithm, data Structures Course | Institut Teknologi Del

February 2025 – May 2025

- Assisted in teaching and learning activities by preparing lecture materials, supervising practicums, arranging licenses, and evaluating student progress.
- Facilitated class discussions, provided guidance on core operating systems, algorithm design, data structures concepts, and strengthened communication, time management, and collaboration skills.

Backend Developer Internship | DB KLIK

April 2025 – June 2025

- Developed and optimized a web-based Asset Management System using PHP and the Laravel framework, streamlining internal tracking and resource allocation.
- Designed and implemented secure RESTful APIs to facilitate seamless data communication and integration with front-end interfaces.

Fullstack Developer Internship | Zona EBT

June 2025 – August 2025

- Developed an end-to-end product payment website using PHP and the Laravel framework, enabling seamless digital transactions for users
- Integrated Midtrans Payment Gateway to handle secure and automated transactions, supporting multiple payment methods (E-wallets, Bank Transfers, and Qris).

Software Engineer Internship | PT Umalo Sedia Tekno

June 2025 – December 2025

- Developed a cross-platform desktop application for AI-powered face recognition attendance using Electron, React (Vite), and Node.js, ensuring responsive performance and accurate real-time logging across multiple devices.
- Designed and implemented secure RESTful APIs and database architecture to manage attendance data, optimize synchronization, and support offline-first capabilities for enterprise environments.

Software Engineer | PT Perintis Kode Global

June 2025 – Present

- Designed and developed responsive web applications and mobile platforms using React, Vite, and Node.js, improving overall platform performance and user experience. Deployment application and website.
- Collaborated on optimizing application source code, successfully reducing page load times and enhancing platform scalability.

PROJECT EXPERIENCE

FIND ME IN PNIEL | IGDx Indonesia | <https://github.com/mitsuha19/LYNCH-VIEX.git>

May 2024 – September 2024

- Developed Find Me in Pniel, a horror game with immersive storytelling, AI-driven enemy behavior, and strategic resource management.
- Designed entrie level environments and core gameplay mechanics, collaborating with a multidisciplinary team for a polished experience.

Snap-Stream | PT Umalo Sedia Tekno | <https://github.com/Riovan716/Snap-Stream.git>

October 2025 – December 2025

- Engineered a professional real-time live streaming and recording platform using React , TypeScript, and Node.js (Express), integrating an Electron desktop application wrapper and a web-based dashboard.
- Integrated MediaSoup as a WebRTC SFU (Selective Forwarding Unit) alongside Socket.io to facilitate ultra-low latency multimedia streaming and automated server-side video recording workflows.

Face Recognition | PT Umalo Sedia Tekno | https://github.com/Riovan716/face_recognition.git

June 2025 – September 2025

- Developed a desktop-based automated attendance system from scratch by integrating Face Recognition technology within an Electron and React frontend framework.
- Engineered a robust backend API utilizing **Node.js (Express)** and **Sequelize ORM (MySQL)** to handle real-time biometric data sync, session management, and automated database sync processes.

Honestest | Institut Teknologi Del | https://github.com/Riovan716/dekstop_app_honestest_tauri.git

August 2025 – March 2026

- Design and implement an efficient and secure exam desktop application using the Tauri framework (Rust backend and React/JS frontend) as a replacement for the heavy ElectronJS.
- Proving the effectiveness of the system through comparative and inferential statistical analysis, which shows an increase in hardware performance and a drastic decrease in the number of exam cheating.

Altech Website | PT Alltech Rental Sarana Samudera | alltechrental.co.id

February 2026 – April 2026

- Architected and developed a full-stack commercial equipment rental platform from scratch using React (Vite) and Node.js, delivering a responsive end-to-end web application.
- Designed and implemented secure RESTful APIs to manage dynamic feature on website.
- Managed full-cycle production deployment and server configuration.

ORGANIZATIONAL EXPERIENCE

Vice Chair Division | Informatics Student Association

July 2023 – June 2024

- Led a group discussion on the planning of project from the interest talent division.
- Arrange licenses for the implementation of activities.
- Establish cooperation with external parties to support activities.

Vice Chair | Badan Eksekutif Mahasiswa

December 2024 – January 2025

- Led BEM in managing organizational programs and strategic initiatives.
- Coordinate interdepartmental collaboration and ensure effective communication.
- Represent BEM in engagements with internal and external stakeholders.
- Support student welfare programs and organizational development efforts.

SKILLS

- Programming Language : Java, C, PHP, JavaScript, TypeScript, Kotlin, Dart, HTML5, CSS3.
- Frameworks & Runtimes: Laravel, Node.js, React.js, Electron, Flutter, Tauri.
- Developer Tools: GitHub, Postman, Docker, PostgreSQL, phpMyAdmin, VS Code.
- Office Productivity: Microsoft Office (Excel, Word, PowerPoint).
- Soft Skills: Public Speaking, Teamwork, Communication & Presentation, Problem Solving.
